NICAR-BATE

Active Ingredient: Nicarbazine and Ethopabate.

Specification: Nicarbazine 15% and Ethopabate 1% Premix.

Characteristics: Yellow powder/Granular.

Indications:

Anti-coccidiosis, for the prevention of chicken coccidiosis.

Pharmacology:

Nicarbazine and Ethopabate have the anticoccidial effect by inhibiting asexual schizogenesis of coccidia; the activity peak is in the second generation of schizont (namely is the 4th day in coccidian life cycle), and they will have a better anti-coccidia effect when using together.

Usage&Dosage:

Mixed feeding. Recommended Dosage:

Animal Species	Nicarbazine + Ethopabate Premix (g) per 1000 kg feeding stuff	Nicarbazine Concentration (ppm)	Ethopabate Concentration (ppm)
Chicken	500	75	5

- Forbid using in laying chicken and breeders.
- Be more careful when using in the high temperature season.
- Forbid using directly. It should be made into premix or solution, and mixed evenly with feed before using.

Withdrawal Period: 9 days.

Package: 25 kg/bag.

Storage: Store in a cool and dry place, in sealed or closed container.

Expiry: Two years.
